SUMMARY

Data Engineer with 5 years of software engineering experience: 3+ years of full stack development and nearly 2 years in data engineering, working with SQL Server, ETL (SSIS, Apache NiFi) and Python. Responsible for data development across three concurrent client projects: data ingestion, file migration, and SSIS modernization. Skilled in data modeling, SQL tuning, and explaining technical work to non-technical users; training in Databricks, PySpark, and Fabric.

TECHNICAL SKILLS

Data Engineering: ETL/ELT, Data Pipelines, Data Ingestion, Data Modeling, Data Warehousing, Data Quality
Data Tools & Platforms: SSIS, Apache NiFi, SSRS, Snowflake, Power BI; in training: Databricks, PySpark, Fabric
Databases & Storage: SQL Server (T-SQL), PostgreSQL, MySQL, Isilon
Programming: SQL, Python, C#, Go, JavaScript
Cloud & DevOps: Microsoft Azure (VMs, Azure Database for PostgreSQL, Nginx), Git, Bash scripting
Languages: Spanish (Native), English (B2+, Professional Working Proficiency)

PROFESSIONAL EXPERIENCE

Data Engineer May 2026 – Present
Martinezsa Costa Rica

- Main developer for data engineering solutions at two government judicial entities; sole builder of their **NiFi** flows.
- Built a metadata-driven **file migration** pipeline to **Isilon** storage with **NiFi**, **Python**, and **SQL Server**: a metadata table drives each transfer, and files are renamed by file ID and verified by Python scripts.
- Ensured end-to-end integrity: rejects corrupted or encrypted files, verifies **SHA-256** hashes at the destination, retries failed transfers up to a limit, and logs every result and error to SQL Server **audit tables**.
- Build a **NiFi log ingestion** flow that loads application logs from multiple virtual machines into a database the analytics team uses to feed an AI support agent.
- Modernize legacy **SSIS** ETL and SQL processes for a regional financial institution: adapt existing packages to new tables and servers, troubleshoot incremental loads, and resolve data tickets.

Full Stack Engineer May 2025 – Apr 2026
Freelance Costa Rica

- **FactuBot**: built a **Python** (Django) ETL bot for multiple accountants that pulls XML invoices from Gmail on a schedule, deduplicates and validates them against Costa Rica tax authority (Hacienda) rules, routes failures to an error queue, and loads **Azure Database for PostgreSQL** for VAT and P&L KPIs.
- **OftaData**: gathered requirements with the doctor and trained staff; designed the **PostgreSQL** database, Go backend, Vue.js frontend, and **Azure** deployment (VM, firewall, SSL) of a system centralizing 1,000+ patient forms with medical images across 5 clinics; daily database and image backups (7-day retention) restored data after real incidents.

RPA Developer II Jan 2025 – Apr 2025
World Kinect Remote

- Built **Python** and **C#** automation blocks to extract invoice data from PDFs (OCR) into a financial system.
- Owned the migration of a high-volume daily fuel invoice process from **UiPath** to **Power Automate**.
- Monitored production workflows and **Azure DevOps** pipeline runs triggered from Power Apps, reviewing logs and resolving failures; built quarterly reports in **Power BI**.
- Led **C#** code reviews for an 8-person team; secondary technical lead supporting developers on Power Apps.

Fullstack Engineer Jan 2023 – Sep 2024
GBSYS Costa Rica

- Developed complex **SQL Server** queries, stored procedures, views, and temporary tables for transactional modules and financial reporting (**SSRS**), tuning performance through indexing, query optimization, and execution plan analysis.
- Designed relational schemas for banking and government systems built with **C#** and **.NET MVC**, and led the migration of a 10+ year-old Oracle Forms application to Oracle APEX, delivered ahead of schedule.

EDUCATION

Universidad Nacional Jan 2019 – Jul 2023
Bachelor's Degree in Information Systems Engineering Costa Rica

CERTIFICATIONS

Microsoft Certified: Azure Fundamentals (AZ-900) Aug 2023
Oracle APEX Cloud Developer Certified Professional Mar 2024
Certified Scrum Master – International Scrum Institute Jan 2023
